

7.5 Billion people want clean, inexpensive and constant energy

We spend \$15 Trillion per year on Energy

ZPower invented solar panels that work at night

After 18 years of development and \$4.5 million invested - our panels work constantly (day and night)

We sell electricity to Utility Companies for 1.5 ¢

A small utility contract (100 megawatts) generates \$12.8 million per year for 20 years

**Funding Needed >> \$10 million**

Used to complete and manufacture our first product - 1 megawatt generator (will power 250 homes)
