What is Radiant Energy?

The Hidden Energy that Exists All Around Us

Energy exists all around us. We can't see it, but it is always there.

Physicist & Nobel Laureate Richard Feynman explained "one teacup of empty space contains enough energy to boil all the world's oceans"

Radiant Energy also goes by the names **Zero Point Energy** or **Quantum Energy** or **Infinite Energy** or **Vacuum Energy** or **Etheric Energy**.

Radiant Energy is the infinite, abundant energy that exists all around us, waiting to be tapped through advanced technologies. This energy is always available, if we know how to collect it.

Our scientists have learned how to collect this energy to provide **clean, constant, low-cost energy** for a starving world.

Solar Panels collect only visible sunlight energy 4-6 hours a day.

ZPower's **Radiant Panels** collect energy 24 hours a day.

We have powered a 2000 sq ft home for 1 year with our oven-size prototype generator.
